COVER LETTER

Reliable products. Dependable systems.

October 27, 2026

Dear Hiring Team,

I am a senior software engineer who turns ambiguous product needs into dependable systems. My work sits at the intersection of product engineering and platform engineering: I build customer-facing applications, APIs, cloud infrastructure, delivery automation, observability, and the operational practices that keep software healthy after launch.

At BAAS Software, I own the complete software lifecycle across web, mobile, cloud, DevOps, reliability, and security. I have helped maintain 99.9% uptime while reducing release time by 40%, and I have delivered AWS infrastructure, CI/CD pipelines, production diagnostics, and secure identity workflows. Earlier roles at USAA and product agencies strengthened my experience with enterprise reliability, incident response, quality engineering, accessible interfaces, and client-focused delivery.

I am most valuable where a team needs both breadth and follow-through: someone who can shape the architecture, write the software, improve the path to production, and stay accountable for the result in operation. I bring a product mindset, a platform backbone, and a practical bias toward clear systems that teams can maintain and extend.

I would welcome the opportunity to discuss how that combination could support your products, engineering organization, and customers. Thank you for your consideration.

Sincerely,

Thomas Miller

PROFILE

Product mindset. Platform backbone.

Platform-focused engineer with more than 10 years of experience building full-stack products and the systems that keep them reliable: cloud infrastructure, CI/CD, observability, identity and access management, scalable architecture, incident response, and technical leadership.

10+ years
Professional experience

BAAS Software
Most recent position

Texas Tech University
BBA, Information Technology

SKILLS

Capabilities across the software lifecycle

	DISCIPLINE	TOOLS AND PRACTICES
01	**Languages**	HTML, CSS, Sass, JavaScript, TypeScript, Java, Go, Python, C#
02	**Web Development**	React, Next.js, Tailwind CSS, Redux, Zustand, Jest, Vite, Selenium, Storybook
03	**API Development**	Node.js, Express, Fiber, Gin, Django, Spring Boot, GraphQL, Headless CMS
04	**App Development**	Flutter, Ionic, .NET, React Native, Three.js, Unity, Unreal Engine
05	**Infrastructure**	AWS, Docker, Kubernetes, Serverless, Terraform, NGINX, HAProxy, Load Balancing
06	**Security & Identity**	IAM, JWT, Sessions, CORS, CSRF, RBAC, PBAC, Keycloak, Okta, LDAP
07	**DevOps**	CI/CD, GitOps, GitHub Actions, GitLab CI/CD, Jenkins, Helm, Prometheus, Grafana, ELK

	DISCIPLINE	TOOLS AND PRACTICES
08	**Site Reliability**	High Availability, Latency Optimization, Auto Scaling, Monitoring, Incident Response
09	**Testing**	Unit, Integration, End-to-End, Performance, Security Testing
10	**Data & Databases**	PostgreSQL, MySQL, MongoDB, DynamoDB, Cassandra, Redis, RabbitMQ, Kafka
11	**Architecture**	Monoliths, Microservices, DDD, TDD, Event-Driven Architecture, System Design
12	**Documentation**	API Docs, Architecture, Requirements, Deployment, Swagger, Postman, UML, Docusaurus
13	**Delivery & Leadership**	Agile, Scrum, Cross-Functional Collaboration, Mentoring

CAREER TIMELINE

Professional experience

Build / Ship / Operate / Improve

Senior Software Engineer

June 2022 - Present

BAAS Software / Remote

Own the complete software product lifecycle across web, mobile, cloud, DevOps, reliability, and security.

- Lead products from concept validation and architecture through launch, monitoring, support, and continuous improvement.
- Improved deployment workflows and operational readiness, helping maintain 99.9% uptime while reducing release time by 40%.
- Built AWS infrastructure, observability, least-privilege IAM, and secure OAuth, SSO, 2FA, and session workflows.

Software Engineer III

June 2020 - July 2022

USAA / Remote

Strengthened enterprise reliability, delivery automation, quality engineering, and incident response.

- Automated deployment pipelines and repeatable workflows to improve release consistency, stability, and recovery.
- Led monitoring, incident review, testing, and engineering-quality practices across cross-functional teams.

Software Engineer

July 2018 - May 2020

Web Plant Media / Remote

Built custom WordPress and React experiences while modernizing cloud infrastructure and delivery practices.

- Created reusable React component systems, responsive interfaces, and accessible custom WordPress themes.
- Migrated client platforms to AWS and added monitoring, backups, disaster recovery, and performance improvements.

Software Engineer

February 2017 - July 2018

Caprock Custom Apps

Delivered custom web and mobile products from discovery and architecture through app-store release and support.

- Built front-end interfaces, Node.js and Express services, APIs, integrations, and mobile applications.
- Reduced response time by up to 30% and introduced reusable patterns that lowered technical debt.

IT Support Technician / Supervisor

November 2015 - August 2017

IT Help Central / Texas Tech University

Resolved complex technology issues, led support operations, and created knowledge resources for a large university community.

- Promoted to Lead Technician and coordinated daily support work, escalations, and technical projects.
- Created searchable troubleshooting documentation used by thousands of users and support technicians.

SELECTED BUILDS

Portfolio projects

Architecture meets useful interfaces

01 EazyHQ

June 2026 - Active development

Independent product / Lead Software Engineer

A modular workspace operating system for projects, data, automation, content, and team workflows.

ENGINEERING FOCUS Designed an add-on architecture, event-driven automation engine, configurable dashboards, permission-aware workspaces, and cross-platform delivery.

Flutter / Dart / Go / PostgreSQL / Redis / Docker / GitHub Actions

github.com/WTMx3/eazyhq

VIEW REPOSITORY >

02 Listings+

2025 - Portfolio snapshot

Portfolio product / Full-Stack Software Engineer

An AI-assisted real-estate platform that converts natural-language intent into structured searches and grounded property results.

ENGINEERING FOCUS Built structured AI retrieval, multi-source listing APIs, persisted provenance, layered caching, Typesense search, and a responsive Next.js interface.

Next.js / React / TypeScript / Go / OpenAI API / PostgreSQL / Redis

github.com/WTMx3/listingsplus

VIEW REPOSITORY >

03 PDF Generator Service

2024 - Portfolio snapshot

Portfolio service / Backend Software Engineer

A TypeScript service that renders structured content into polished PDFs and publishes them to S3-compatible storage.

ENGINEERING FOCUS Designed a document-generation API, reusable print layouts, Puppeteer rendering, storage integration, container packaging, and safe temporary-file cleanup.

TypeScript / Express / Puppeteer / AWS SDK / Docker
